It comprises last year's new feature, Auto Laser Focus — which uses infrared signals to determine the distance between the camera and the subject — and a new feature, Colour Spectrum Sensor (CSS). This feature reads the colour values of ambient light in a scene to improve colour accuracy during reproduction in a photo. The sensor is then able to adjust the white balance and flash to create images with colours closer to what the human eye can see.

Bale has set up a lot of goals for Ronaldo but playing alongside him has taken away some of Bale's edge. He needs to become a bit more of an entity at Madrid. But he doesn't deserve the reaction he is getting. I don't understand why the fans aren't warming to him. Yes, his performances have dipped slightly, but that's all it is, a dip.
